

*Together, Driving the Future of Production*

April 20, 2026

ANNOUNCEMENT

**US Rod, a subsidiary of Q2 Artificial Lift Services, Announces Strategic Partnership with Superod®**

US Rod Co., a subsidiary of Q2 Artificial Lift Services, is proud to announce a new strategic partnership with Superod®, a recognized leader in rod string design and optimization technology for the oil and gas industry specializing in the manufacturing of high-quality fiberglass sucker rod.

This collaboration brings together US Rod's expertise in rod manufacturing and artificial lift solutions with Superod's superior fiberglass design and a state-of-the-art patented end fitting. Together, the companies aim to deliver enhanced performance, improved efficiency, and optimized production outcomes for operators across North America.

"Partnering with Superod allows us to further strengthen the value we provide to our customers," said Doug Quinn, President & CEO, Q2ALS. By integrating advanced design capabilities with high-quality rod products, we are better positioned to support operators in maximizing well performance and reducing operational costs."

Through this partnership, customers will benefit from:

1. Improved rod string design accuracy
2. Enhanced system efficiency and longevity
3. Data-driven optimization for artificial lift systems

US Rod Co. and Q2 Artificial Lift Services remain committed to delivering innovative, reliable solutions that drive success for their clients.

**About US Rod Co.**

US Rod, a subsidiary of Q2 Artificial Lift Services, specializes in high-quality sucker rod manufacturing and artificial lift solutions.

**About Superod®**

Superod is an industry leader in rod string design software, providing advanced engineering tools to optimize artificial lift performance.
